

Subject- English
Sample Paper for DA Students
Session 2024-25
Class VIII

Time: 3 hrs.

M.M.80

1. Objective Type Questions:

i) **Read the passage and answer the questions that follow: 4q*2m=8marks**

Of all the trees of southern Asia, the banyan is unique, not only for the manner of its growth but for the area of shade it provides from the burning sun. Its close relationship with man has evolved over the years to make the banyan a popular meeting place, a focal point of worship and a source of practical materials for commerce. Known as 'the strangler fig' because of its unusual manner of growth, the banyan is an epiphyte or air plant that has its birth in the branches of a host tree and lives on airborne moisture and nutrients. Banyan seeds are deposited by birds, bats or monkeys in the rich soil collected in the crevices of host-tree branches. As the banyan grows, it sends aerial roots down the trunk of the supporting tree. In time, the roots that reach the ground choke the host tree by preventing its trunk from enlarging. The two best-known species of banyans are the Indian, one of the world's largest tropical trees; and the Chinese, a smaller species with fewer aerial roots.

Choose the correct option for the following questions:

1. Why is the banyan called the 'strangler fig'?

- (a) because it chokes the host tree
- (b) because it chokes other trees
- (c) because it chokes the drains
- (d) Any of these three

2. In what ways is the banyan tree unique?

- (a) It is unique in the manner of its growth.
- (b) It is unique in terms of the area of shade it provides.
- (c) Both (a) and (b)
- (d) Neither (a) nor

3. The banyan tree is a popular meeting place because.....

- (a) it provides cool shade
